

Jam Kat Pick-Holster Size Adjustment Instructions

WARNING! THE FOLLOWING INSTRUCTIONS REQUIRE THE USE OF BOILING WATER.

Boiling water may result in accidents, burns or severe injury.

CHILDREN SHOULD NOT ATTEMPT THE ADJUSTMENT PROCEDURE.

The following technique allows size adjustment from 1/2 to 1 full size bigger or smaller. Greater than 1 size adjustment is not recommended.

PLEASE READ AND UNDERSTAND THE DIRECTIONS AND DISCLAIMER PRIOR TO MODIFICATION!

1. Boil water and fill a cup to the top.

2. Turn your Jam Kat upside down. Grasp the ring section while holding the pick and harness up and away from the water.

3. Dip ONLY the bridge section of the ring into the water for 30 seconds. (The bridge section is between the Jam Kat "ears".)

4. Remove from water. Applying slight pressure, make the ring larger or smaller, as desired.

5. Holding the new 'shape', cool the bridge in cold water for 30 seconds.

6. Carefully dry the bridge and check the fit. The procedure may be repeated, if necessary.
